

Pneuline Supply, Inc.

WPF SERIES INLINE FILTERS

Key Advantages

Customization at Your Fingertips:

Tailor the WPF Series to meet your exact filtration needs. Choose from a wide range of materials, connector styles, sizes, and filter options so you can test, refine, and select the perfect fit for your application.

Superior Filter Selection:

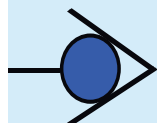

Choose from Polyester, Nylon, Polypropylene, Kynar®, or Stainless Steel for added strength. Available in multiple micron ratings to precisely target your required particle size.

Versatile Connections:

Available in male or female luer, or barbed styles, with sizes 1/8", 3/16", 1/4", 5/16", and 3/8". Our quality filters are built to support diverse filtration applications with flexibility.

Precision & Quality:

Cleanroom manufacturing is available upon request for added assurance. Customize with laser-printed markings, color-coded inlets/outlets to show flow direction, and other tailored features to meet your needs.
